Combination Play To Finish

Lorem Khaled Ipsum is a major key to success. I'm up to something. They will try to close the door on you, just open it.

Summary

- Make quick short passes with precision and good weight
- Alternate surfaces of the foot you use, ie- inside/outside
- Good body position to receive and play forward or flick behind
- Movement before receiving
- Scanning before receiving

Description:

Set up your players in a triangle with the forward player located at the point of the triangle (**Player A**). **Players B and C** will interchange passes and play into **Player A**. **Player A**, will then set **either player** who will meet the ball and strike towards the goal. Feel free to add progressions like changing the movement of player A and B. Changing the distance and type of pass that comes into player A to work on their receiving skills.
